| # | Common Name | Scientific Name | Ecol. Status | Abundance | References |
|----|-------------------------|---|--------------|---|------------|
| 1. | South Polar Skua | <i>Stercorarius maccormicki</i> | Sum mig | 1 obs 3 nm N 11.3.2002, | 3, |
| 2. | Shining Flycatcher | <i>Myiagra alecto lucida</i> | Res bre | UC-C in Lowland Swamp forest, littoral & riparian scrub | 1,2, |
| 3. | Scarlet-bibbed Myzomela | <i>Myzomela sclateri (no ssp)</i> | Res bre | Common in forests. | 1,2, |
| 4. | Yellow-bellied Sunbird | <i>Nectarinia jugularis flavigaster</i> | Res bre | MC-C mostly outside of forests | 1,2, |

KEY

Ecological status

End = Endemic to Island unless otherwise stated, **Res bre** = Resident breeder, **Res** = resident ie breeding not proven or not likely. For seabirds it means they have or should be found in that area: note other refs. **Vag** = Vagrant, **Res/mig** = Part of population migratory, **Sum mig** = Summer migrant, **Win mig** = Winter migrant, **Spr/Aut mig** = Passage migrant in Spring and Autumn, **Intro** = Introduced.

Abundance

R = rare, **S** = scarce, **UC** = uncommon, **MC** = moderately common, **LC** = locally common, **C** = common, **VC** = very common, **A** = abundant, **P** present.

Colour coding applies only to one species on a particular list. eg. An abundance comment in **red** for the Brown Booby refers to the Ref # in **Red** for that species only.

Alternate Island Names & alternate common Bird Names are recorded in two separate spreadsheet files.
