#	Common Name	Scientific Name	Ecol. Status	Abundance	References
					_
1.	Wilson's Storm Petrel	Oceanites oceanicus	Win mig	1 obs 31 km SSW 5.10.1985,	5,
2.	Pied Imperial Pigeon	Columba p. pacifica	Res bre	In Litt.	2,3,
3.	Common Golden Whistler	Pachycephala pectoralis collaris	Res bre	Forests & regrowth, ssp innominata desc by Ramsay,	1,2,4,

KEY

Ecological status

End = Endemic to Island unless otherwise stated, **Res bre** = Resident breeder, **Res** = resident ie breeding not proven or not likely. For seabirds it means they have or should be found in that area: note other refs. Vag = Vagrant, Res/mig = Part of population migratory, Sum mig = Summer migrant, Win mig = Winter migrant, Spr/Aut mig = Passage migrant in Spring and Autumn, Intro = Introduced.

Abundance

 $\mathbf{R} = \text{rare}, \mathbf{S} = \text{scarce}, \mathbf{UC} = \text{uncommon}, \mathbf{MC} = \text{moderately common}, \mathbf{LC} = \text{locally common}, \mathbf{C} = \text{common}, \mathbf{VC} = \text{very common}, \mathbf{A} = \text{abundant } \mathbf{P} = \text{present}.$

Colour coding applies only to one species on a particular list. eg. An abundance comment in red for the Brown Booby refers to the Ref # in Red for that species only. Alternate Island Names & alternate common Bird Names are recorded in two separate spreadsheet files.
